

I am writing in reference to the proposed change relative to Low Power FM. I am concerned that this will adversely impact my ability to hear K-LOVE. This national radio station provides a wonder alternative to the "pop" culture currently aired on my local stations. I never have to worry if my 5-year will hear something that he shouldn't from the music or announcements from this station. Please don't impact my reception of K-LOVE. In Raleigh this is on station 106.7. Thank you.
